

Välkommen till Scanpack 2009 – B01:22

Kom och se den senaste tekniska utvecklingen från våra leverantörer i vår monter på Scanpack i år – **B01:22**. Vi ser fram emot att möta dig där!

Boka ert möte med oss på Scanpack redan idag. Ring på +46 31 701 0990 eller skicka e-post till: jan.johannesson@gotapack.se, martin@gotapack.se

- **Groninger:** syringe filling- and closing machine DFVN 1000 V

DFVN 1000 V: Filling and stoppering machine for presterilized disposable syringes in the nest.

Highlights:

- Compact design
- Single syringe centering prevents glass breakage
- Possible integration of a laminar flow unit above the machine protection
- Vacuum filling and stoppering as an option
- Clear, simple execution
- One or two-position

Processing range: 6.85 – 29.85 mm

Stations: 1 or 2

Output (pieces/h): up to 2.100 (1-head)
up to 4.700 (2-head)

dimensions: 1.550 x 900 x 2.000

Contact person Groninger: **Rudolf Weiss**

- **Ceia:** metal detector THS/PH21

THS/PH21: designed to detect and eject metal contaminants that may be accidentally present, even in very small quantities, in pharmaceutical products.

- transit tunnel and ejection system completely sealed
- design and construction compliant with 21 CFR Parts 210 and 211
- enhanced product throughput rate
- completely housed in AISI 316 stainless steel
- easy dissembling and maintenance in short time without the use of machine-specific tools
- electronic record and signatures management compliant with CFR Part 11

Contact person Ceia: **Massimo Meacci**

o **Cremer:** Counting machine CF1220

CF-1220: 12-channel high-speed tablet and capsule counter with single-track bottle conveyor.

Standard features:

- Large bulk hopper with product level detection
- Vibratory plates for efficient product separation
- Dust collecting tubes
- 100% accurate infrared product detection unit
- Pneumatic 'memory flap' unit for pre-counting
- Vibrating filling nozzle
- Pneumatic gating system for fast container indexing
- Conveyor track 'empty' and 'full' sensors
- Electric height adjustment for different bottle heights
- Hand-held Terminal
- 21CFR part 11 compliant Touch-Screen terminal

Contact person Cremer: **Jan Koen Anthoni**

o **Fette:** FS12 segment turret

FS12 segment turret: standard presses extraordinary productivity leap

Highlights:

- Up to 40% more yield from the same machine type
- EU12 turret with 110 stations
- EU12 punch format adapted to standard requirements
- Optimized EU12 punch head for long pressure dwell times
- Smooth machine running due to the large number of punches engaged at any time
- Compression force limited to 25 kN
- Optimized for standard sizes of round tablets
- Replaces additional machine investment
- High production capacity
- 3090i/3200i now even more productive
- Designed as a genuine alternative to multiple tools, with the advantage of single tablet pressing
- True single compression force measurement even with very small diameters, in contrast to multiple punches

Contact person Fette: **Martin Davies**

- o **pester pac automation:** single full overwrapper PEWO-fold C120

PEWO-fold C120 for premium cartons, such as exclusive quality perfumes and cosmetics packaging

- Extremely accurate, very tight and scratch-free - exquisite wrapping of premium cosmetics cartons
- Extremely gentle handling of high gloss surfaces via fully synchronized servo technology
- High-speed: constant product transfer with 120 cycles at a single level
- One-of-a-kind: maintenance-free and tool-less film transportation system
- Accurate sealing quality: spot or flat sealing via electronic temperature controller
- Highly flexible: extensive format range and fast format changeover
- innovative operating concept and straightforward operating logic via HMI touch screen
- Patented film splicer: fully automatic film reel change without stopping production
- Modular construction in future-oriented grid system
- Wear-free sealing tools and ultimate sealing quality through precision temperature control
- Accurate serration of film through use of special cutter

Contact person Pester: **Willi Rassel**

- o **Seidenader:** T&T SingleUnit

Seidenader T&TSolutions allows single item, bundle, case and pallet serialization at the product packaging process in the pharmaceutical industry

- Integrated solution from one supplier with profound experience in automation, vision systems and material handling
- In full compliance with legislations regulating track and trace concepts, like ITS (Turkey 2009), French Coding (2011), e-pedigree (California 2015) and adaptable future legal requirements
- Customized solutions to be integrated in existing production lines as well as in new processes
- Designed for small to large applications: from machine level over multi-line to multi-site applications
- Flexible database management system securing full audit trail
- Protection against counterfeiting through highest possible transparency in packaging process

Contact person Seidenader: **Britta Rackebrandt**

Våra övriga leverantörer **Plümat**, **Oystar-Iwk**, **Deckert** samt **Bohle** kommer givetvis att medverka under mässan.

	weighing, granulating, sieving, blending, coating, containment and handling
	counting and packaging systems
	tablet presses, tablet control systems, tablet dedusters, tablet handling systems
	metal detection systems for quality control
	Pharmaceutical and cosmetic filling and packaging machines for all kinds of objects, i.e. vials, syringes, eye-drop, nasal-sprays, fragrances, shampoos, creams, nail polish, etc.
	tube filling machines, blister packers, cartoners, handling systems, project engineering
	stretch wrappers, grouping systems, full-over wrappers, side loaders, top loaders, wrap-around, palletizers
	forming-, filling- and closing machines for pharmaceutical liquids
	Solutions for filling, capping and handling tablets and powders.
	Automatic track-and-trace systems for the pharmaceutical industry

Vänligen kontakta oss för ett personligt möte under mässan!
