

MediSeal

Pharma Packaging Technology

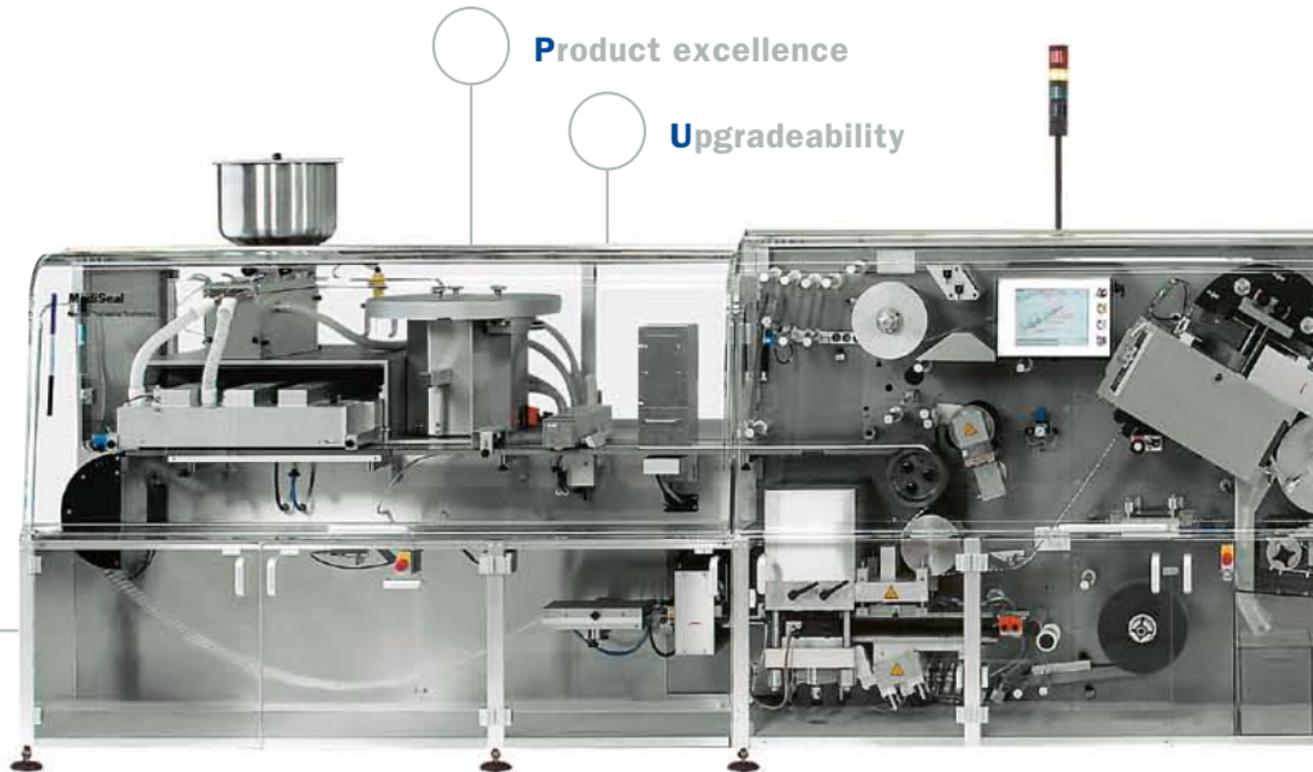

Powerful and Flexible.
The PUMA300 from MediSeal.

PUMA300

Compact, flexible and modular.

Today, when markets are changing faster than ever before, efficiency and flexibility are more important than ever. The new PUMA300's highly reliable modular technology means that you can react to new challenges at any time. Change formats in record time or use the unique facility to switch between platen and roller sealing. Stay cool and secure your investment for the future.

Product excellence

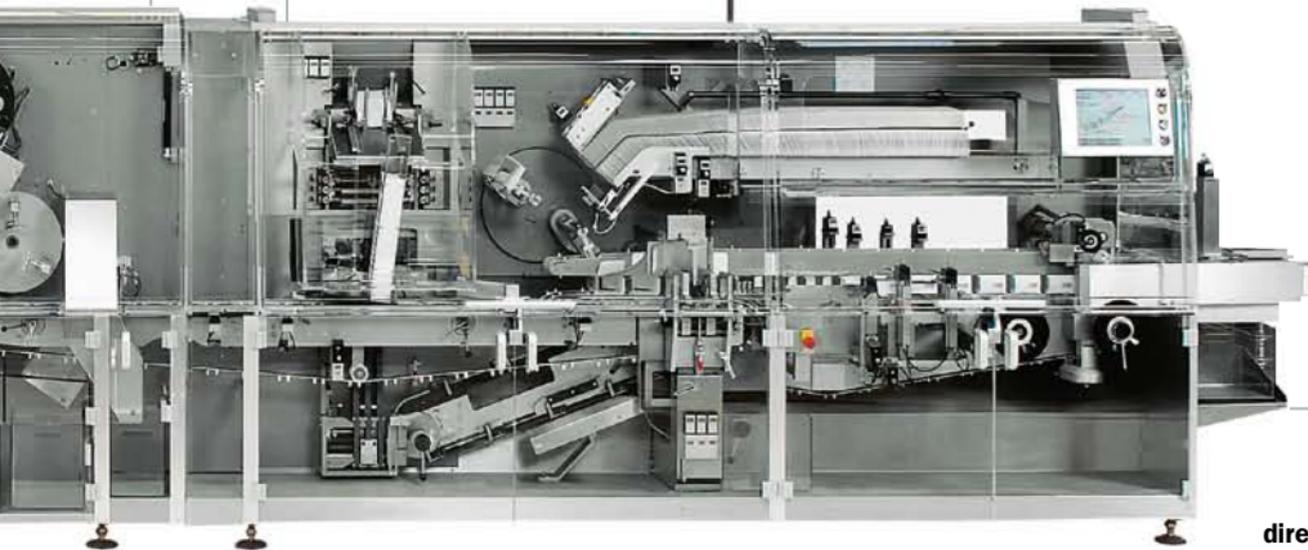

Upgradeability

Flexibility is
a question of the right technology.

Example photo includes options

Modular

Adaptability

Taking the overall view.

Efficient technology is measured not only by the price of the machine but also by the sum of all the costs incurred throughout the long lifetime of the machine. This is where the overall economic benefits of a PUMA300 are evident. With more than 15 years experience of servo machine technology, it is possible to achieve greater turnover and greater profit per machine than ever before, thanks to exceptional availability, low operating costs and the low cost of format parts.

**Features: colour fill check,
direct transfer, central console
and more**

**A great leap forward:
the new PUMA300**

Superior – but not arrogant.
We have the technology.

Redefine your horizons.

With the new PUMA300.

Additional value which pays for itself. Compact, flexible and modular.
